

11/14 APUs operating (3 unknown)

Submitted by Patrick.Gatlin on Thu, 2013-05-02 09:04

Date:

Thursday, May 2, 2013 - 09:00

Instrument List:

- [Yellow](#)

Discussion:

APU03 and 04 are not accessible via their host network computer (2dvdsn36). Thus something may have hung in those APU computers. APU08 is also having similar issues. Thus a site visit will be done today to each of these 3. All other networked APUs are sending data to the trmm-fc server.
